SUMMARY

Frontend Developer and Full Stack Developer with 2+ years of experience building scalable web applications using Angular and TypeScript. Currently working at Nexotips Infotech on real-world products including textile management systems and marketplace platforms. Strong focus on performance, reusable components, and user experience.

TECH. SKILLS

Frontend: Angular 18, Typescript, JavaScript, HTML5, CSS3, SCSS, NgRx (State Management), Material, Bootstrap.

Backend: Node.js, Express, REST APIs, WebSockets, Swagger, Postman.

Database: MySQL, MongoDB, Firebase, PostgreSQL.

Tools: Git, Postman, Swagger.

Practices: Agile, Leadership, Strong Communication, collaborative, Problem-solving, MVC Architecture, Adaptive

EDUCATION

Bachelor of Information Technology

Gujarat Technological University • Gujarat • 2024 (Distinction)

- Participated in academic projects and coding competitions, enhancing technical and analytical skills early on.

EXPERIENCE

Full Stack Developer (Internship + Full-Time)

Nexotips Infotech – India

January 2024 - Present,

- Led a team of 3 developers to deliver scalable Angular and Node.js solutions for clients across the USA and Europe, increasing productivity by 25% via process automation.
- Rebuilt Nexotips' website using Angular 14, integrating MFA and improving functionality and user experience.
- Delivered enterprise projects for clients like Find A Hunt, Market for Home, Textile Manage, NextDev and Nexcount, with a strong focus on performance, accessibility, and UI/UX.
- Created dynamic, responsive UIs using Angular, HTML, CSS, and JavaScript for operational and marketing use cases.
- Gained hands-on experience in Angular and modern front-end development through real-world projects and mentorship.

PROJECTS

NexDev – Developer Portal / Internal Management Platform | 10 Months

Full Stack Developer | Angular, TypeScript, REST APIs, Authentication System

- Designed and developed RESTful APIs for managing developer workflows, user roles, and project operations.
- Implemented secure authentication and role-based access control (RBAC) ensuring controlled access to system resources.
- Optimized API performance using efficient data fetching and modular service architecture.
- Integrated frontend with backend services enabling real-time data updates and seamless user experience.
- Applied lazy loading and state management techniques to improve application scalability and load time.

Textile ERP – Inventory, POS & Workforce Management System | 10 Months

Full Stack Developer | Angular, [Node.js](#), TypeScript, Business Workflows, REST APIs, Authentication System

- Designed and developed a full-scale ERP backend system handling inventory, POS, employee, and order workflows.
- Built REST APIs for billing, stock management, and order tracking ensuring real-time synchronization across modules.
- Implemented POS system with efficient transaction handling and invoice generation logic
- Structured database models for inventory and workforce management, reducing data redundancy and improving accuracy
- Developed role-based access control for employees and admins ensuring secure operations

Nexotips Infotech – IT Services & Custom Software Development Company | 5 Months

Frontend Developer | Angular, TypeScript, REST APIs, UI/UX, Web Applications

- Worked closely with UI/UX teams to design intuitive, user-friendly interfaces aligned with modern design standards
- Ensured code quality and performance optimization through reusable components, modular architecture, and best practices.
- Developed responsive, high-performance user interfaces using Angular, ensuring seamless user experience across devices.
- Participated in end-to-end development lifecycle including requirement analysis, development, testing, and deployment.
- Collaborated with cross-functional teams to meet client requirements.

FindAHunt - Hotel Stay and hunting platform| 1 Years

Full Stack Developer - Angular, Stripe, Google Maps, Calendar, Firebase Cloud Messaging

- Built an enterprise grade communication platform using Angular and Web Socket for real-time messaging and collaboration.
- Implemented secure user roles and permissions to ensure data privacy and access control.
- Designed a scalable architecture capable of handling concurrent users and large-scale data efficiently.

Wallzy – 4K Live Wallpaper Mobile Application | 4 Months

Full Stack Developer | Angular, [Node.js](#), Firebase, Media Management

- Designed backend workflows for managing large-scale media content including images and videos.
 - Implemented Firebase Cloud Messaging for automated daily notifications improving user engagement.
 - Built admin panel APIs for uploading, organizing, and maintaining content efficiently.
 - Optimized media storage and retrieval for faster access and reduced latency.
 - Ensured reliable notification delivery and scheduling to maintain consistent user interaction.
-
