

DENCY DESAI

Full Stack Developer · Node.js & Angular Specialist

desaidency8@gmail.com | +91 95101 55609 | [linkedin.com/in/dency-desai](https://www.linkedin.com/in/dency-desai) | github.com/Dency25 | Surat, Gujarat, India

Full-stack developer with 2+ years shipping production REST APIs, authentication systems, and Angular interfaces for clients across the US and Europe. I work best owning a project end-to-end — architecture, database design, API development, and the front end on top — and I document everything I build so handoff is never a bottleneck.

CORE SERVICES

- REST API design & development — Node.js, Express, TypeScript
- Authentication, authorization & role-based access control (JWT, RBAC)
- Database architecture — MySQL, MongoDB, PostgreSQL, Firebase
- Real-time features — WebSockets, live messaging, push notifications
- Angular front-end development & API integration
- API documentation & testing — Swagger, Postman

TECHNICAL SKILLS

Backend: Node.js, Express.js, TypeScript, REST APIs, WebSockets, JWT, RBAC, Swagger, Postman

Frontend: Angular 18, TypeScript, JavaScript, NgRx, Angular Material, TailwindCSS, Bootstrap, SCSS

Database: MySQL, MongoDB, PostgreSQL, Firebase

Practices: Agile, MVC Architecture, Git/GitHub, Team Leadership

KEY ACHIEVEMENTS

- Led a 3-developer team delivering Node.js + Angular products for clients across the US and Europe
- Increased delivery efficiency 25% through workflow automation
- Shipped 6+ production platforms spanning ERP, real-time booking, developer tooling, and media management
- Documented every API in Swagger and verified endpoints in Postman before client handoff

PROFESSIONAL EXPERIENCE

Full Stack Developer — Nexotips Infotech, India Jan 2024 — Present

- Architect REST APIs, JWT authentication, and RBAC for enterprise applications
- Design database schemas and queries across MySQL, MongoDB, PostgreSQL, and Firebase
- Lead a team of 3 developers on client-facing Node.js + Angular products
- Rebuilt Nexotips' own marketing site in Angular 14 with multi-factor authentication

SELECTED PROJECTS

NexDev — Developer Portal (Full Stack · 10 months)

Internal platform for managing developer workflows, roles, and project state, with JWT + RBAC security and real-time sync between Angular and Node services.

Stack: Angular, Node.js, TypeScript, MySQL

Textile ERP — Inventory, POS & Workforce (Full Stack · 10 months)

Full-scale ERP covering inventory, POS, staff, and order workflows, with transaction handling, invoice generation, and role-based access for admins and staff.

Stack: Angular, Node.js, TypeScript, MongoDB

FindAHunt — Booking & Real-Time Messaging Platform (Backend-led · 1 year)

Hotel-stay and hunt-management platform with WebSocket messaging and Stripe payments, architected to hold up under concurrent, high-volume traffic.

Stack: Node.js, WebSockets, Stripe, Firebase

Wallzy — 4K Live Wallpaper App (Full Stack)

Media-heavy mobile app backend with optimized storage and retrieval, plus Firebase Cloud Messaging for daily notification campaigns.

Stack: Node.js, Angular, Firebase

EDUCATION

Bachelor of Information Technology — Gujarat Technological University, 2024 (Distinction)
